

April 13, 2012

I have been using Quick-Sol on my lawn since last October. Our grass this spring greened up quickly and is healthier than it has ever been. I spray it with Quick-Sol every 2 weeks. We had some large cracks in the soil that used to return between watering. But after 3 treatments with Quick-Sol the cracks went away and the soil has loosened up. The grass is healthier and requires less watering.
