

## **DeBusk Farms**

“It’s difficult to convince older farmers, such as myself, to use new products when they’re set in their ways, but I decided to try Quick-Sol and that was 2 years ago. I’ve had a 20 to 30 percent increase in yields, not to mention a much healthier plant throughout the entire season. If you’ll take the time and apply it the right way you’re going to see benefits. Yes, I plan to continue using Quick-Sol and I recommend it to all the other growers out there.”
